TECTONOPHYSICS

Contents

Tectonophysics Volume 245

Research Papers

Mechanics of triangle zones and passive-roof duplexes: implications of finite-element models
S.G. Erickson 1

Elastic modeling of fault-driven monoclinal fold patterns
G. Shamir and Y. Eyal 13

Migration of igneous activities related to ridge subduction in Southwest Japan and the East Asian continental margin from the Mesozoic to the Paleogene
O. Kinoshita 25

Magnetically inferred basement structure in central Saudi Arabia
P.R. Johnson and I.C.F. Stewart 37

Study of the characteristics of crustal stress field in East China by inversion of nodal-plane data
Z. Huilan and D. Rugang 53

The tectonic evolution of West Siberia: an attempt at a geophysical analysis
S.V. Aplonov 61

Deep electrical conductivity of East Siberia and the Far East of Russia
Yu.F. Moroz and A.V. Pospeev 85

Discussions

Time calibration of Triassic/Jurassic microfloral turnover, eastern North America—Comment
P.M. van Veen 93

Time calibration of Triassic/Jurassic microfloral turnover, eastern North America—Reply
S.J. Fowell and P.E. Olsen 96

Magnitude–frequency distribution in the European–Mediterranean earthquake regions — Comment
Y.Y. Kagan 101

Magnitude–frequency distribution in the European–Mediterranean earthquake regions — Reply
V. Kárník and K. Klíma 106

Geometry of fault-propagation folds: method and application — Comment
E. Mercier, F. Outtani, D. Frizon de Lamotte and H. Ghandriche 111

Book Review

The Inaccessible Earth, an Integrated View to its Structure and Composition (2nd edition), by G.C. Brown and A.E. Mussett.
S. Yangshen, L. Huafu and W. Shimin 115

Special Issue: Influence of Fluids on Deformation Processes in Rocks

(edited by C.J. Spiers and T. Takeshita)

Preface 117

Kinetics of pressure solution creep in quartz: theoretical considerations
I. Shimizu 121

A theory for granular flow accommodated by material transfer via an intergranular fluid
M.S. Paterson 135
A model for intergranular pressure solution in open systems
F.K. Lehner 153
Creep of wet gypsum aggregates under hydrostatic loading conditions
S. de Meer and C.J. Spiers 171
Diffusivity of ions in pore water as a quantitative basis for rock deformation rate estimates
S. Nakashima 185
Microcracking during triaxial deformation of porous rocks monitored by changes in rock physical properties. I. Elastic-wave propagation measurements on dry rocks
M.R. Ayling, P.G. Meredith and S.A.F. Murrell 205
Microcracking during triaxial deformation of porous rocks monitored by changes in rock physical properties. II. Pore volumometry and acoustic emission measurements on water-saturated rocks
M.D. Read, M.R. Ayling, P.G. Meredith and S.A.F. Murrell 223
Deformation and pore pressure in dehydrating gypsum under transiently drained conditions
D.L. Olgaard, S.-c. Ko and T.-f. Wong 237
Crack geometries and deformation by the crack-seal mechanism in the Sambagawa metamorphic belt
M. Toriumi and E. Hara 249
Infrared microspectroscopy analysis of water distribution in deformed and metamorphosed rocks
S. Nakashima, H. Matayoshi, T. Yuko, K. Michibayashi, T. Masuda, N. Kuroki, H. Yamagishi, Y. Ito and A. Nakamura 263
Dynamic analysis of deformed quartz grains from the folded Middle Miocene Momonoki Subgroup of central Japan: origin of healed microcracks
T. Takeshita 277
